Revised LG BOLC Training Strategy

- ✓ UMO Certification complete **ONLY** at gaining duty station
- ✓ Standard block of instruction across three base branches (QM, OD, TC) to prepare for multi-functional logistics assignments
- ✓ Addition of ATHP, Recovery, UMO blocks of instruction into BOLD Challenge
- ✓ Realistic logistics based tactical scenarios into BOLD Challenge FTX (LRPs, ATHP)
- ✓ Physical Readiness (Must Pass ACFT)

LG BOLC Key Training Events

Individual

Lethality

LG BOLC lays the foundation for individual lethality thru **M4 Qualification, basic rifle marksmanship**, and the **Modern Army Combative Program**. Lieutenants also gain familiarity with the M240B/M249 weapons systems. These skills will be applied at the small unit and platoon levels as they encounter realistic tactical logistics situations during BOLD Challenge (LRPs, Convoys, CTCP Defense). LG BOLC Classes average 36/40 qualification.

Small Unit

Fundamentals

Preparation for LSCO requires proficiency at fundamental skills like land navigation. All LG BOLC lieutenants are required pass a 6 out of 8 **land navigation test** night into day in order to meet graduation requirements. Furthermore, lieutenants demonstrate proficiency at **small unit and individual movement techniques, dismounted formation types, and hand arm signals**. This foundation sets the stage for **tactical convoy, ATHP, and Recovery operations** during BOLD Challenge FTX.

Platoon

BOLD Challenge

LG BOLC culminates in a training exercise testing lieutenant **decision making** and **logistics skills** learned throughout the course. Lieutenants deploy to an operational area that requires logistics support BDE and below. **The tactical setting** requires lieutenants to conduct **tactical convoys, tactical logistics resupply, and reinforces logistics processes** (LOGSTATs, synchronization) in a contested environment.
